SUBJECT INDEX

A

Abnormalities
Diabetes mellitus
Mesenchymal tissue, 358

Absorption
Ovalbumin
Alveolocapillary barrier, 1103
Lung, rat, 1103
Serum albumin
Alveolocapillary barrier, 1103
Lung, rat, 1103

Acetamide, *N*-(acetyloxy)-*N*-fluoren-2-yl-
DNA repair
Lymphocytes, 1164
Poly(adenosine diphosphoribose)
Lymphocytes, 1164

Acetic acid
Sodium bicarbonate
Metabolism, kidney cortex, 704

Acetoacetic acid
Food deprivation
Acetone, 619

Acetone
Food deprivation
Acetoacetic acid, 619
Butyric acid, 3-hydroxy-, 619
Glucose, 619
Metabolism, plasma, 619
Ketosis
Food deprivation, 619

***N*-Acetoxyacetylaminofluorine**
see Acetamide, *N*-(acetyloxy)-*N*-fluoren-2-yl-

Acetylsalicyclic acid
see Salicylic acids

Acid-base imbalance
Hydrogen-ion concentration
Kidney cortex, 704
Mitochondria, 704
Kidney cortex
Dog, rabbit, 704
Sodium bicarbonate
Kidney cortex, 704
Mitochondria, 704

Acidosis
Bicarbonate
Parathyroid hormone, 985
Parathyroid hormone
Nephrectomy, 985
Thyroidectomy, 985
Potassium
Parathyroid hormone, 985
Sodium
Parathyroid hormone, 985

ACTH
see Corticotropin

Actinomycetales
Tuberculosis, pulmonary
Tuberculostearic acid, 813

Addison's disease
Corticotropin
Feedback mechanisms, 247
Cortisol
Corticotropin, 247
Dexamethasone
Corticotropin, 247

Adenine
Glucosephosphate isomerase deficiency
Membrane proteins, 552
Lesch-Nyhan syndrome
Uric acid, 922
Platelets
Hydrogen peroxide, 177
Myeloperoxidase, 177

Adenine nucleotides
Colchicine
Pancreas, rat, 1284

Adenocarcinoma
Macrophages
Antitumor activity, 977

Adenoma
Adrenal gland neoplasms
Angiotensin II, 718

Adenosine cyclic-3′,5′-monophosphate
Blood platelets
Serotonin, 1211
Calcitonin
Osteoblasts, 750
Osteoclasts, 750
Dexamethasone
Osteoblasts, 750
Osteoclasts, 750
Glucagon
Liver, rat, 525
Hyperthyroidism
Catecholamines, 184
Erythrocytes, 184
Leukemia, lymphocytic
T-Lymphocytes, 1124
B-Lymphocytes
Metabolism, 1124
T-Lymphocytes
Metabolism, 1124
Parathyroid hormone
Bone marrow cells, rat, 750
Dexamethasone, 750
Metabolism, kidney, 1110
Osteoblasts, 750
Osteoclasts, 750
Thyroidectomy, 371
Phosphatidylcholines
Pulmonary surfactant, 378
Ricinoleic acid, sodium salt
Intestinal mucosa, 743

Adenosine deaminase
Adenosine, 2-deoxy-
Hydrolases, 807
Erythrocytes
Binding sites, 1066
Catalysis, 1066
Membrane interactions, 1066

Adenosine, 2-deoxy-
Adenosine deaminase
Hydrolases, 807
S-Adenosylhomocysteine
Hydrolases, 807
Erythrocytes
Hydrolases, 807

Adenosine diphosphate
Prostaglandins G
Platelet aggregation, 215
Tubulin
Platelet aggregation, 443

Adenosine triphosphate
Glucosephosphate isomerase deficiency
Erythrocytes, 552

***S*-Adenosylhomocysteine**
Adenosine, 2-deoxy-
Hydrolases, 807

Adenyl cyclase
Blood platelets
Thrombin, 1211
Hyperthyroidism
Catecholamines, 184
Erythrocytes, 184
Leukemia, lymphocytic
B-Lymphocytes, 1124
T-Lymphocytes, 1124
B-Lymphocytes
Enzymatic activity, 1124
T-Lymphocytes
Enzymatic activity, 1124
Rickets, vitamin D resistant
Parathyroid hormone, 1203

Adipose tissue
Epinephrine
Lipolysis, rat, 403
Insulin
Carrier proteins, 1077
Lipolysis, rat, 403
Methylglucosides, 1077
Obesity
Cell number, size, 239
Children, adolescents, 239

Adrenal gland neoplasms
Adenoma
Angiotensin II, 718
Hyperaldosteronism
Angiotensin II, 718

Adrenal glands
Hyperplasia
Angiotensin II, 718
Hypertension
Angiotensin II, 419
Receptors, angiotensin, 419

Adrenergic α receptor agonists
Phosphatidylcholines
Alveolar type II cells, 378

Adrenergic β receptor agonists
Phentolamine
Cycloleucine, 1172
Phenylephrine
Cycloleucine, 1172
Phosphatidylcholines
Alveolar type II cells, 378
Prolactol
Cycloleucine, 1172
Terbutaline
Cycloleucine, 1172
Triiodothyronine
Cycloleucine, 1172

Afibrinogenemia
Candida
Hypersensitivity, delayed, 1302
Hypersensitivity, delayed
Induration, 1302
Streptodornase and streptokinase, 1302
Mumps antigen
Hypersensitivity, delayed, 1302
Skin Tests
Erythema, 1302
Fibrin deposition, 1302
Streptodornase and streptokinase
Hypersensitivity, delayed, 1302
Tuberculin
Hypersensitivity, delayed, 1302

Agammaglobulinemia
Antibody formation
Hemolytic plaque technique, 868
IgM
Antibody formation, 868
Immunologic deficiency syndromes
Hemolytic plaque technique, 868
B-Lymphocytes
IgM, 868
T-Lymphocytes
Antibody formation, 868

Aging
Alpha 1-antitrypsin
Protein deficiency, 299
Diabetes mellitus
Skin fibroblasts, 358
Diabetes mellitus, juvenile
Cells, cultured, 358

Airway resistance
SRS-A
Dose-response study, 1

Alanine aminotransferase
Cycloheximide
Liver function tests, rat, 684

Aldosterone
Angiotensin II
Plasma levels, lamb, 287
Bromocriptine
Angiotensin II, 727
Plasma levels, 727
Furosemide
Plasma levels, lamb, 287
Hyperaldosteronism
Angiotensin II, 718
Hypertension
Angiotensin II, 419
Metoclopramide
Angiotensin II, 727
Plasma levels, 727

Alkaline phosphatase
Cycloheximide
Liver function tests, rat, 684
Neutrophils
Superoxide, 21
Parathyroid hormone
Dexamethasone, 750
Osteoblasts, 750
Osteoclasts, 750

Alpha 1-antitrypsin
Aging
Protein deficiency, 299
Lung volume measurements
Phenotype, 299
Pulmonary emphysema
Protein deficiency, 299
Smoking, 299
Smoking
Lung volume measurements, 299

Alpha globulins
Proteinuria
Carbohydrates, 318
Isolation and characterization, 318
B-Lymphocytes, 318
T-Lymphocytes, 318
Tissue distribution, 318

Alveolocapillary barrier
Ovalbumin
Absorption, 1103
Hypersensitivity, 1103
Serum albumin
Absorption, 1103
Hypersensitivity, 1103

Amines
Vaginitis
Bacteria, 828
Carboxy-lyases, 828
Identification, vaginal fluid, 828
Metronidazole, 828

Amino acids
Diabetes mellitus
Pancreatectomy, 820
Neutrophils
Peptide hydrolases, 998
Pancreatectomy
Plasma, 820
Triiodothyronine
Biological transport, 507
Vaginitis
Haemophilus vaginalis, 828

Ammonia
Hepatic coma
Blood circulation, 449
Metabolism, brain, 449
Hypertension, portal
Metabolism, brain, 449
Liver diseases
Metabolism, brain, 449
Liver neoplasms
Metabolism, brain, 449

Amylases
Cerulein
Pancreas, rat, 478
Cholecystokinin
Pancreas, rat, 478

Amyloid
Endotoxins
Blood proteins, 254
Casein, 254
Escherichia coli, 254
IgG, 254
Lipopolysaccharides, 254
Ovalbumin, 254
Pepstatins, 254
Serum albumin, bovine, 254
Lipopolysaccharides
Blood proteins, 254
Escherichia coli, 254
Pepstatins
Leupeptins, 254

3α-Androstanediol
Estradiol
Receptors, hormone, 351

Anemia, aplastic
Erythrocytes
Erythropoiesis, 173
Fetal hemoglobin, 173
Fetal hemoglobin
Immunodiffusion assay, 173
Reticulocytes
Fetal hemoglobin, 173

Anemia, hemolytic, congenital
Glucosephosphate isomerase deficiency
Erythrocytes, 552
Membrane proteins, 552

Anemia, hypochromic
Erythrocytes
Erythropoiesis, 173
Fetal hemoglobin, 173
Fetal hemoglobin
Immunodiffusion assay, 173
Reticulocytes
Fetal hemoglobin, 173

Anemia, sickle cell
Erythrocytes
Erythropoiesis, 173
Fetal hemoglobin
Cells, cultured, 804
Erythropoiesis, 804
Immunodiffusion assay, 173
Immunoglobulins, gamma chain, 268
Hemoglobins
Cells, cultured, 804
Erythropoiesis, 804

Angiotensin converting enzyme
see Kininase II

Angiotensin II
Adrenal gland neoplasms
Adenoma, 718
Hyperaldosteronism, 718
Adrenal glands
Hyperplasia, 718
Aldosterone
Plasma levels, lamb, 287
Bromocriptine
Aldosterone, 727
Prolactin, 727
Renin, 727
Hyperaldosteronism
Aldosterone, 718
Blood pressure, 718
Hypertension
Adrenal gland, 419
Aldosterone, 419
Saralasin, 419
Metoclopramide
Aldosterone, 727
Prolactin, 727
Renin, 727
Renin
Plasma levels, 727
Plasma levels, lamb, 287
Vasopressin
Plasma levels, lamb, 287

Angiotensins
Anoxia
Endothelial cells, 966
Kininase II
Anoxia, 966
Endothelial cells, 966

Anions
Sodium bicarbonate
Kidney cortex, 704

Anoxia
Angiotensins
Endothelial cells, 966
Kininase II, 966
Arginine vasopressin
Metabolism, kidney, 6
Kininase II
Enzymatic activity, 966

Anti-antibodies
Lupus erythematosus, systemic
IgG, 536
IgM, 954
Immunosuppression, 536
T-Lymphocytes, 536, 954

Antibodies
Pseudomonas aeruginosa
Exotoxins, 276
Hemagglutination tests, 276
Immune response, 276
Lipopolysaccharides, 276
Septicemia
Pseudomonas aeruginosa, 276

Antibodies, bacterial
Liver cirrhosis
Escherichia coli, 912
IgM, 912

Antibody-dependent cell cytotoxicity
T-Lymphocytes
Concanavalin A, 1157
Methylprednisolone, 1157
Radiation, 1157
Suppressor cells, 1157

Antibody formation
Agammaglobulinemia
Hemolytic plaque technique, 868
IgM, 868
T-Lymphocytes, 868
Immunologic deficiency syndromes
Hemolytic plaque technique, 868
IgM, 868
Lipoproteins, LDL
T-Lymphocytes, 193
Lupus erythematosus, systemic
Testosterone, dihydro-, 902
B-Lymphocytes
IgG, 193

Antibody specificity
Neisseria meningitidis
Vaccines, 836
Pituitary gland
Calcitonin, 1297
Corticotropin, 1297
Endorphins, 1297
Polysaccharides, bacterial
IgM, 836
Purpura
Histocompatibility antigens, 1085
Thrombopenia
Histocompatibility antigens, 1085

Antigen-antibody complex
IgG
Hepatitis B surface antigen, 627
Rheumatoid factor, 627
Neutrophils
Phagocytosis, 793
Staphylococcal protein A
IgG, 627
Staphylococcus aureus, 627

Antigen-antibody reactions
Blood platelets
Factor XI, 1006
Fibronectin
Blood platelets, 540
Lupus erythematosus, systemic
Tetanus toxoid, 885

Antigenic determinants
Arthritis, juvenile rheumatoid
Histocompatibility antigens, 124

Aortocoronary bypass
Tachycardia
Cardiac output, 695

JANUARY 1979 VOLUME 63 NUMBER 1

1 Differential effects of a partially purified preparation of slow-reacting substance of anaphylaxis on guinea pig tracheal spirals and parenchymal strips. *Jeffrey M. Drazen, Robert A. Lewis, Stephen I. Wasserman, Robert P. Orange, and K. Frank Austen*

6 The handling of immunoreactive vasopressing by the isolated perfused rat kidney. *Ralph Rabkin, Leonard Share, Paul A. Payne, Judy Young, and Joan Crofton*

14 The effect of acute and chronic ethanol intake on hepatic glycerolipid biosynthesis in the hamster. *Robert G. Lamb, Craig K. Wood, and Harold J. Fallon*

21 Subcellular localization of the superoxide-forming enzyme in human neutrophils. *Beatrice Dewald, Marco Baggiolini, John T. Curnutte, and Bernard M. Babior*

30 Hyperoxic attenuation of exercise-induced bronchospasm in asthmatics. *Philip L. Schiffman, Angéle Ryan, Brian J. Whipp, James E. Hansen, and Karlman Wasserman*

38 Cholic acid biosynthesis. The enzymatic defect in cerebrotendinous xanthomatosis. *Gerald Salen, S. Shefer, F. W. Cheng, B. Dayal, A. K. Batta, and G. S. Tint*

45 Turnover of human and monkey plasma kininogens in rhesus monkeys. *Tadataka Yamada, David A. Wing, Jack V. Pierce, and George W. Pettit*

53 An ascorbate-mediated transmembrane-reducing system of the human erythrocyte. *Eugene P. Orringer and Marjorie E. S. Roer*

59 Loop of Henle bicarbonate accumulation in vivo in the rat. *D. Z. Levine, M. K. Byers, R. A. McLeod, and J. A. Luisello*

67 Mechanisms of lymphocyte activation. The role of suppressor cells in the proliferative responses of chronic lymphatic leukemia lymphocytes. *Guy B. Faguet*

75 Role of microtubules in low density lipoprotein processing by cultured cells. *Richard E. Ostlund, Jr., Barbara Pfleger, and Gustav Schonfeld*

85 Demonstration of a specific neutrophil receptor for a cell-derived chemotactic factor. *Isaias Spilberg and Jagdish Mehta*

89 Analysis of parathyroid hormone and its fragments in rat tissues. Chemical identification and microscopical localization. *Pierre D'Amour, Gino V. Segre, Sanford I. Roth, and John T. Potts, Jr.*

99 Assessment of the efficacy of interventions to limit ischemic injury by direct measurement of intramural carbon dioxide tension after coronary artery occlusion in the dog. *L. David Hillis, Shukri F. Khuri, Eugene Braunwald, Robert A. Kloner, Donald Tow, Ernest Barsamian, and Peter R. Maroko*

108 A study of human leukocyte D locus related antigens in Graves' disease. *Nadir R. Farid, Laura Sampson, Elke P. Noel, John M. Barnard, Robert Mandeville, Bodil Larsen, William H. Marshall, and Nicholas D. Carter*

114 Synergistic interactions of physiologic increments of glucagon, epinephrine, and cortisol in the dog. A model for stress-induced hyperglycemia. *Neal Eigler, Luigi Saccà, and Robert S. Sherwin*

124 Different HLA-D associations in adult and juvenile rheumatoid arthritis. *Peter Stastny and Chester W. Fink*

131 Effects of prostaglandin cyclic endoperoxides on the lung circulation of unanesthetized sheep. *Ronald E. Bowers, Earl F. Ellis, Kenneth L. Brigham, and John A. Oates*

138 Enzyme replacement therapy by fibroblast transplantation. Long-term biochemical study in three cases of Hunter's syndrome. *Michael F. Dean, Richard L. Stevens, Helen Muir, Philip F. Benson, Linda R. Button, Rene L. Anderson, Art Boylston, and James Mowbray*

RAPID PUBLICATIONS

147 C5 chemotactic fragment induces leukocyte production of tissue factor activity. A link between complement and coagulation. *Thomas W. Muhlfelder, Julian Niemetz, Don Kreutzer, Debra Beebe, Peter A. Ward, and Stephen I. Rosenfeld*

151 The cellular basis of the impaired autologous mixed lymphocyte reaction in patients with systemic lupus erythematosus. *Mary M. Kuntz, Judith B. Innes, and Marc E. Weksler*

154 Lymphocyte adherence in multiple sclerosis. Effect of aspirin. *Paula Dore-Duffy and Robert B. Zurier*

158 Aspirin inhibits development of coronary atherosclerosis in cynomolgus monkeys (*Macaca fascicularis*) fed an atherogenic diet. *Ruth Pick, Juan Chediak, and Gerald Glick*

164 JANUARY AUTHOR INDEX

165 CORRECTION

FEBRUARY 1979 VOLUME 63 NUMBER 2

167 In vivo regulation of secretion of bronchiolar clara cells in rats. *Gloria D. Massaro, Marguerite Paris, and Lyn Aung Thet*

173 Production of erythrocytes that contain fetal hemoglobin in anemia. Transient in vivo changes. *George J. Dover, Samuel H. Boyer, and William H. Zinkham*

177 Myeloperoxidase-mediated platelet release reaction. *Robert A. Clark and Seymour J. Klebanoff*

184 The influence of hyperthyroidism and hypothyroidism on the β-adrenergic responsiveness of the turkey erythrocyte. *John P. Bilezikian, John N. Loeb, and Donald E. Gammon*

193 Differential sensitivity of lymphocyte subpopulations to suppression by low density lipoprotein inhibitor, an immunoregulatory human serum low density lipoprotein. *Linda K. Curtiss and Thomas S. Edgington*

202 Changes in lymphocyte activity after thermal injury. The role of suppressor cells. *Carol L. Miller and Christopher C. Baker*

211 Collecting duct sodium reabsorption in deoxycorticosterone-treated rats. *John A. Haas, Theresa J. Berndt, Stephen P. Youngberg, and Franklyn G. Knox*

215 Selective binding site for [^{3}H]prostacyclin on platelets. *Adelaide M. Siegl, J. Bryan Smith, Melvin J. Silver, K. C. Nicolaou, and D. Ahern*

221 Motility and adhesiveness in human neutrophils. Effects of chemotactic factors. *C. Wayne Smith, James C. Hollers, Richard A. Patrick, and Clare Hassett*

230 Adrenergic modulation of pancreatic A, B, and D cells. α-Adrenergic suppression and β-adrenergic stimulation of somatostatin secretion, α-adrenergic stimulation of glucagon secretion in the perfused dog pancreas. *Ellis Samols and Gordon C. Weir*

239 The growth of adipose tissue in children and adolescents. Cross-sectional and longitudinal studies of adipose cell number and size. *Jerome L. Knittle, Kim Timmers, Fredda Ginsberg-Fellner, Roy E. Brown, and David P. Katz*

247 Differential and integral corticosteroid feedback effects on ACTH secretion in hypoadrenocorticism. *H. L. Fehm, K. H. Voigt, G. Kummer, R. Lang, and E. F. Pfeiffer*

254 Some effects of the administration of endotoxin in mice. Specific cleavage of serum albumin by an acid protease and the generation of amyloid serum component. *Peter D. Gorevic, Yoram Levo, Prem C. Chatpar, Blas Frangione, and E. C. Franklin*

262 Administration of gonadal steroids to the castrated male rat prevents a decrease in the release of gonadotropin-releasing hormone from the incubated hypothalamus. *Robert S. Rudenstein, Homayoon Bigdeli, Maureen H. McDonald, and Peter J. Snyder*

268 Further studies of the frequency and significance of the ^{T}γ-chain of human fetal hemoglobin. *W. A. Schroeder, T. H. J. Huisman, G. D. Efremov, J. Roger Shelton, Joan B. Shelton, Robert Phillips, Alice Reese, Marsha Gravely, J. Michael Harrison and Henry Lam*

276 Protective activity of antibodies to exotoxin A and lipopolysaccharide at the onset of *pseudomonas aeruginosa* septicemia in man. *Matthew Pollack and Lowell S. Young*

287 Endogenous angiotensin stimulation of vasopressin in the newborn lamb. *Sharon R. Siegel, Richard E. Weitzman, and Delbert A. Fisher*

294 Effect of atropine on vagal release of gastrin and pancreatic polypeptide. *Mark Feldman, Charles T. Richardson, Ian L. Taylor, and John H. Walsh*

299 Assessment of alpha-1-antitrypsin deficiency heterozygosity as a risk factor in the etiology of emphysema. Physiological comparison of adult normal and heterozygous protease inhibitor phenotype subjects from a random population. *Dennis J. McDonagh, Stephen P. Nathan, Ronald J. Knudson, and Michael D. Lebowitz*

310 Dopamine during α- or β-adrenergic blockade in man. Hormonal, metabolic, and cardiovascular effects. *Mara Lorenzi, John H. Karam, Eva Tsalikian, Nancy V. Bohannon, John E. Gerich, and Peter H. Forsham*

318 Tissue distribution of human α_1-microglobulin. *Kimiteru Takagi, Kohjin Kin, Yoshihisa Itoh, Tadashi Kawai, Tadashi Kasahara, Toshihiko Shimoda, and Toshio Shikata*

326 Decreased heat-labile opsonic activity and complement levels associated with evidence of C3 breakdown products in infected pleural effusions. *Pablo D. Lew, Rudolph Zubler, Pierre Vaudaux, Jean J. Farquet, Francis A. Waldvogel, and Paul-Henri Lambert*

335 Interactions between vitamin D deficiency and phosphorus depletion in the rat. *Nachman Brautbar, Marlin W. Walling, and Jack W. Coburn*

RAPID PUBLICATIONS

342 Elevated 1,25-dihydroxyvitamin D plasma levels in normal human pregnancy and lactation. *Rajiv Kumar, Wayne R. Cohen, Patricio Silva, and Franklin H. Epstein*

345 Platelet and blood vessel arachidonate metabolism and interactions. *Philip Needleman, Angela Wyche, and Amiram Raz*

350 FEBRUARY AUTHOR INDEX

MARCH 1979 VOLUME 63 NUMBER 3

351 Regulation of cytoplasmic dihydrotestosterone binding in dog prostate by 17β-estradiol. *Ronald J. Moore, John M. Gazak, and Jean D. Wilson*

358 Diabetes mellitus and genetic prediabetes. Decreased replicative capacity of cultured skin fibroblasts. *Samuel Goldstein, Elena J. Moerman, J. Stuart Soeldner, Ray E. Gleason, and Donald M. Barnett*

371 Resistance to the phosphaturic and calcemic actions of parathyroid hormone during phosphate depletion. Prevention by 1,25-dihydroxyvitamin D_3. *H. J. Gloor, J-P. Bonjour, J. Caverzasio, and H. Fleisch*

378 Pulmonary alveolar type II cells isolated from rats. Release of phosphatidylcholine in response to β-adrenergic stimulation. *Leland G. Dobbs and Robert J. Mason*

388 Glucose production in pregnant women at term gestation. Sources of glucose for human fetus. *Satish C. Kalhan, Larry J. D'Angelo, Samuel M. Savin, and Peter A. J. Adam*

395 Reflex inhibition of renal sympathetic nerve activity during myocardial ischemia mediated by left ventricular receptors with vagal afferents in dogs. *Marc D. Thames and Francois M. Abboud*

403 Simulated hyperglycemic hyperosmolar syndrome. Impaired insulin and epinephrine effects upon lipolysis in the isolated rat fat cell. *B. Paul Turpin, William C. Duckworth, and Solomon S. Solomon*

410 Characteristics of volume reabsorption in rabbit superficial and juxtamedullary proximal convoluted tubules. *Harry R. Jacobson*

419 The adrenal receptor for angiotensin II is altered in essential hypertension. *Gordon H. Williams, Norman K. Hollenberg, Thomas J. Moore, Stephen L. Swartz, and Robert G. Dluhy*

428 Interaction of choriocarcinoma cells and human peripheral blood lymphocytes. Resistance of cultured choriocarcinoma cells to cell-mediated cytotoxicity by mitogen-activated lymphocytes. *Charles S. August, Sheila T. Cox, and Michael A. Naughton*

437 Human C4-binding protein. Association with immune complexes in vitro and in vivo. *Julio Scharfstein, Elizabeth B. Correa, Gloria R. Gallo, and Victor Nussenzweig*

443 Quantitative assessment of polymerized and depolymerized platelet microtubules. Changes caused by aggregating agents. *M. Steiner and Y. Ikeda*

449 The dynamics of ammonia metabolism in man. Effects of liver disease and hyperammonemia. *Alan H. Lockwood, Joseph M. McDonald, Robert E. Reiman, Alan S. Gelbard, John S. Laughlin, Thomas E. Duffy, and Fred Plum*

461 Synthesis and secretion of corticosteroid-binding globulin by rat liver. A source of heterogeneity of hepatic corticosteroid-binders. *Jeffrey N. Weiser, Yung-Shun Do, and David Feldman*

468 Circulating immune complexes in Lyme arthritis. Detection by the ^{125}I-C1q binding, C1q solid phase, and Raji cell assays. *John A. Hardin, Lesley C. Walker, Allen C. Steere, Thomas C. Trumble, Kenneth S. K. Tung, Ralph C. Williams, Jr., Shaun Ruddy, and Stephen E. Malawista*

478 Discrepancies between the doses of cholecystokinin or caerulein-stimulating exocrine and endocrine responses in perfused isolated rat pancreas. *Makoto Otsuki, Choitsu Sakamoto, Hosai Yuu, Mitsuo Maeda, Soichiro Morita, Atsuhi Ohki, Noboru Kobayashi, Katsuhiro Terashi, Kuniyasu Okano, and Shigeaki Baba*

485 Reduced fibrinogen survival in diabetes mellitus. A reversible phenomenon. *Robert L. Jones and Charles M. Peterson*

494 Osteomalacia and hyperparathyroid bone disease in patients with nephrotic syndrome. *Hartmut H. Malluche, David A. Goldstein, and Shaul G. Massry*

501 Resting skeletal muscle membrane potential as an index of uremic toxicity. A proposed new method to assess adequacy of hemodialysis. *James R. Cotton, Terry Woodard, Norman W. Carter, and James P. Knochel*

507 Stimulation by triiodothyronine of the in vitro uptake of sugars by rat thymocytes. *Joseph Segal and Sidney H. Ingbar*

516 The role of sulfhydryl groups on the impaired hepatic 3′,3,5-triiodothyronine generation from thyroxine in the hypothyroid, starved, fetal, and neonatal rodent. *Arthur R. C. Harris, Shih-Lieh Fang, Lee Hinerfeld, Lewis E. Braverman, and Apostolos G. Vagenakis*

525 Identical biological effects of pancreatic glucagon and a purified moiety of canine gastric immunoreactive glucagon. *K. Doi, M. Prentki, C. Yip, W. A. Muller, B. Jeanrenaud, and M. Vranic*

RAPID PUBLICATIONS

532 Recovery of endothelial cell prostacyclin production after inhibition by low doses of aspirin. *Eric A. Jaffe and Babette B. Weksler*

536 Suppressor-cell antibody in systemic lupus erythematosus. Possible mechanism for suppressor-cell dysfunction. *Akira Sagawa and Nabih I. Abdou*

540 Identification and quantitation of platelet-associated fibronectin antigen. *Edward F. Plow, Charles Birdwell, and Mark H. Ginsberg*

544 MARCH AUTHOR INDEX

545 The synthesis of glycosaminoglycans by cultures of corneal stromal cells from patients with keratoconus. *Beatrice Y. J. T. Yue, Jules L. Baum, and Jeremiah E. Silbert*

552 Erythrocyte membrane proteins in hereditary glucose-phosphate isomerase deficiency. *T. Coetzer and S. S. Zail*

562 Sympathetic control of lower esophageal sphincter function in the cat. Action of direct cervical and splanchnic nerve stimulation. *Jacques Fournet, William J. Snape, Jr., and Sidney Cohen*

571 Effect of cytochalasin B and D on groups of insulin receptors and on insulin action in rat adipocytes. Possible evidence for a structural relationship of the insulin receptor to the glucose transport system. *Leonard Jarett and Robert M. Smith*

580 Production of diglyceride from phosphatidylinositol in activated human platelets. *S. Rittenhouse-Simmons*

588 Thyrotropin-releasing hormone is not required for thyrotropin secretion in the perinatal rat. *Theodor Theodoropoulos, Lewis E. Braverman, and Apostolos G. Vagenakis*

595 Excretion-reuptake route of β-hexosaminidase in normal and I-cell disease cultured fibroblasts. *Georgirene D. Vladutiu and Mario C. Rattazzi*

602 Pre- and postoperative studies of plasma calcitonin in primary hyperparathyroidism. *Phillip W. Lambert, Hunter Heath III, and Glen W. Sizemore*

609 Polymorphonuclear leukocyte and monocyte chemoattractants produced by human fibroblasts. *Jack D. Sobel and John I. Gallin*

619 Plasma acetone metabolism in the fasting human. *G. A. Reichard, Jr., A. C. Haff, C. L. Skutches, P. Paul, C. P. Holroyde, and O. E. Owen*

627 Binding of immunoglobulin G aggregates and immune complexes in human sera to *Staphylococci* containing protein A. *J. S. McDougal, P. B. Redecha, R. D. Inman, and C. L. Christian*

637 Fluoride-mediated activation of the respiratory burst in human neutrophils. A reversible process. *John T. Curnutte, Bernard M. Babior, and Manfred L. Karnovsky*

648 Generation of chemiluminescence by a particulate fraction isolated from human neutrophils. Analysis of molecular events. *Linda C. McPhail, Lawrence R. DeChatelet, and Richard B. Johnston, Jr.*

656 Demonstration and characterization of specific binding sites for Factor VIII/von Willebrand factor on human platelets. *Kuo-Jang Kao, S. V. Pizzo, and Patrick A. McKee*

665 Morphologic-physiologic correlates of the severity of fibrosis and degree of cellularity in idiopathic pulmonary fibrosis. *Jack D. Fulmer, William C. Roberts, Edwyna R. von Gal, and Ronald G. Crystal*

677 Thymosin-induced suppression of proliferative response of human lymphocytes to mitogens. *Robert E. Wolf*

684 Regulation of hepatic transport of bile salts. Effect of protein synthesis inhibition on excretion of bile salts and their binding to liver surface membrane fractions. *Manuel C. Gonzalez, Eileen Sutherland, and Francis R. Simon*

695 Role of tachycardia as an inotropic stimulus in man. *Donald R. Ricci, Arthur E. Orlick, Edwin L. Alderman, Neil B. Ingels, Jr., George T. Daughters, II, Catherine A. Kusnick, Bruce A. Reitz, and Edward B. Stinson*

704 pH and bicarbonate effects on mitochondrial anion accumulation. Proposed mechanism for changes in renal metabolite levels in acute acid-base disturbances. *David P. Simpson and Steven R. Hager*

713 Glomerular permeability of macromolecules. Effect of molecular configuration or the fractional clearance of uncharged dextran and neutral horseradish peroxidase in the rat. *Helmut G. Rennke and Manjeri A. Venkatachalam*

718 Activity of [des-Aspartyl[1]-angiotensin II in primary aldosteronism. *Robert M. Carey, Carlos R. Ayers, E. Darracott Vaughan, Jr., Michael J. Peach, and Steven M. Herf*

727 Effects of metoclopramide and bromocriptine on the renin-angiotensin-aldosterone system in man. Dopaminergic control of aldosterone. *Robert M. Carey, Michael O. Thorner, and Elizabeth M. Ortt*

736 Defects in DNA and globin messenger RNA in homozygotes for hemoglobin Lepore. *Francesco Ramirez, J. Gregory Mears, Uri Nudel, Arthur Bank, Lucio Luzzatto, Guido DiPrisco, Rossana D'Avino, Guglielmina Pepe, Laura Camardella, Roberto Gambino, Renato Cimino, and Nevio Quattrin*

743 Ricinoleic acid stimulation of active anion secretion in colonic mucosa of the rat. *Lorraine C. Racusen and Henry J. Binder*

750 Glucocorticoid receptors and actions in subpopulations of cultured rat bone cells. Mechanism of dexamethasone potentiation of parathyroid hormone-stimulated cyclic AMP production. *Theresa L. Chen and David Feldman*

759 Immunoglobulin G independent activation of the classical complement pathway by monosodium urate crystals. *Patricia C. Giclas, Mark H. Ginsberg, and Neil R. Cooper*

765 Hypoxanthine uptake in isolated rat renal cortical tubule fragments. *John W. Foreman and Stanton Segal*

772 Requirement of extracellular complement and immunoglobulin for intracellular killing of microorganisms by human monocytes. *Peter C. J. Leijh, Maria Th. van den Barselaar, Theda L. van Zwet, Mohamed R. Daha, and Ralph van Furth*

785 Cyclic hematopoiesis. Effects of endotoxin on colony-forming cells and colony-stimulating activity in grey collie dogs. *William P. Hammond, Elin R. Engelking, and David C. Dale*

RAPID PUBLICATIONS

793 In vitro suppression of serum elastase-inhibitory capacity by reactive oxygen species generated by phagocytosing polymorphonuclear leukocytes. *Harvey Carp and Aaron Janoff*

798 Cortocosteroids inhibit complement-induced granulocyte aggregation. A possible mechanism for their efficacy in shock states. *Dale E. Hammerschmidt, James G. White, Philip R. Craddock, and Harry S. Jacob*

804 Hemoglobin biosynthesis in individual erythropoietic bursts in culture. Studies of adult peripheral blood. *Kinichi Kidoguchi, Makio Ogawa, and Jim D. Karam*

807 In vivo inactivation of erythrocyte S-adenosylhomocysteine hydrolase by 2′-deoxyadenosine in adenosine deaminase-deficient patients. *Michael S. Hershfield, Nicholas M. Kredich, Dennis R. Ownby, Helen Ownby, and Rebecca Buckley*

812 APRIL AUTHOR INDEX

MAY 1979 VOLUME 63 NUMBER 5

813 Demonstration of tuberculostearic acid in sputum from patients with pulmonary tuberculosis by selected ion monitoring. *Göran Odham, Lennart Larsson, and Per-Anders Mårdh*

820 Glucagon immunoreactivities and amino acid profile in plasma of duodenopancreatectomized patients. *Walter A. Muller, Michael Berger, Peter Suter, Hans J. Cüppers, Jürgen Reiter, Thomas Wyss, Peter Berchtold, Felix H. Schmidt, Jean-P. Assal, and Albert E. Renold*

828 Amine content of vaginal fluid from untreated and treated patients with nonspecific vaginitis. *Kirk C. S. Chen, Patricia S. Forsyth, Thomas M. Buchanan, and King K. Holmes*

836 Complex of meningococcal group B polysaccharide and type 2 outer membrane protein immunogenic in man. *W. D Zollinger, R. E. Mandrell, J. M. Griffiss, P. Altieri, and S. Berman*

849 Influence of continuous physiologic hyperinsulinemia on glucose kinetics and counterregulatory hormones in normal and diabetic humans. *Luigi Saccà, Robert Sherwin, Rosa Hendler, and Philip Felig*

858 Effects of nicotinic acid therapy on plasma high density lipoprotein subfraction distribution and composition and on apolipoprotein A metabolism. *James Shepherd, Christopher J. Packard, Josef R. Patsch, Antonio M. Gotto, Jr., and O. David Taunton*

868 Use of a human plaque-forming cell assay to study peripheral blood bursa-equivalent cell activation and excessive suppressor cell activity in humoral immunodeficiency. *Henry G. Herrod and Rebecca H. Buckley*

877 Congenital deficiency of α_2-plasmin inhibitor associated with severe hemorrhagic tendency. *Nobuo Aoki, Hidehiko Saito, Tadashi Kamiya, Katsuo Koie, Yoichi Sakata, and Masateru Kobakura*

885 Immune function in systemic lupus erythematosus. Impairment of in vitro T-cell proliferation and in vivo antibody response to exogenous antigen. *A. B. Gottlieb, R. G. Lahita, N. Chiorazzi, and H. G. Kunkel*

893 Role of Ia-like products of the main histocompatibility complex in conditioning skin allograft survival in man. *J. Dausset, L. Contu, L. Legrand, A. Marcelli-Barge, T. Meo, and F. T. Rapaport*

902 Delayed androgen treatment prolongs survival in murine lupus. *J. R. Roubinian, N. Talal, J. S. Greenspan, J. R. Goodman, and P. K. Siiteri*

912 Deficient serum bactericidal activity against *Escherichia coli* in patients with cirrhosis of the liver. *Joshua Fierer and Fred Finley*

922 Overproduction of uric acid in hypoxanthine-guanine phosphoribosyltransferase deficiency. Contribution by impaired purine salvage. *N. Lawrence Edwards, David Recker, and Irving H. Fox*

931 Hemoglobin Indianapolis (β112[G14] arginine). An unstable β-chain variant producing the phenotype of severe β-thalassemia. *Junius G. Adams, III, Laurence A. Boxer, Robert L. Baehner, Bernard G. Forget, G. A. Tsistrakis, and Martin H. Steinberg*

939 Insulin sensitivity and insulin binding to monocytes in maturity-onset diabetes. *Ralph DeFronzo, David Deibert, Rosa Hendler, Philip Felig, and Vijay Soman*

947 Effects of nitroglycerin and propranolol on the distribution of transmural myocardial blood flow during ischemia in the absence of hemodynamic changes in the unanesthetized dog. *Judith L. Swain, John P. Parker, Philip A. McHale, and Joseph C. Greenfield, Jr.*

954 Studies of immune functions of patients with systemic lupus erythematosus. Complement-dependent immunoglobulin M anti-thymus-derived cell antibodies preferentially inactivate suppressor cells. *Tsuyoshi Sakane, Alfred D. Steinberg, J. Patton Reeves, and Ira Green*

966 Inhibition of angiotensin converting enzyme activity in cultured endothelial cells by hypoxia. *S. Alex Stalcup, Joel S. Lipset, Jin-Mei Woan, Philippe Leuenberger, and Robert B. Mellins*

977 Cytotoxicity of human macrophages for tumor cells. Enhancement by human lymphocyte mediators. *Deborah J. Cameron and W. Hallowell Churchill*

985 An extrarenal role for parathyroid hormone in the disposal of acute acid loads in rats and dogs. *Donald S. Fraley and Sheldon Adler*

998 Purification and characterization of a human neutrophil neutral protease. The neutral peptide-generating protease. *Jonathan S. Coblyn, K. Frank Austen, and Bruce U. Wintroub*

1006 Human platelets and Factor XI. Localization in platelet membranes of Factor XI-like activity and its functional distinction from plasma Factor XI. *Myatt S. Lipscomb and Peter N. Walsh*

1015 Increased surface tension favors pulmonary edema formation in anesthetized dogs' lungs. *Richard K. Albert, S. Lakshminarayan, Jacob Hildebrandt, Wayne Kirk, and John Butler*

1019 Folate distribution in cultured human cells. Studies on 5,10-CH_2-H_4PteGlu reductase deficiency. *David S. Rosenblatt, Bernard A. Cooper, Sally Lue-Shing, Paul W. K. Wong, Stanley Berlow, Kuniaka Narisawa, and Regula Baumgartner*

1026 Shortening of the bleeding time in rabbits by hydrocortisone caused by inhibition of prostacyclin generation by the vessel wall. *M. A. Blajchman, A. F. Senyi, J. Hirsh, Y. Surya, M. Buchanan, and J. F. Mustard*

1036 Manometry of the normal upper esophageal sphincter and its alterations in laryngectomy. *Richard W. Welch, Kenneth Luckmann, Phillip M. Ricks, Samuel T. Drake, and George A. Gates*

1042 Taurocholate pool size and distribution in the fetal rat. *J. M. Little, J. E. Richey, D. H. Van Thiel, and R. Lester*

1050 Characterization of circulating insulin and proinsulin-binding antibodies in autoimmune hypoglycemia. *Jose Goldman, David Baldwin, Arthur H. Rubenstein, Douglas D. Klink, William G. Blackard, Lynda K. Fisher, Thomas F. Roe, and Joel J. Schnure*

1060 Demonstration and partial characterization of insulin receptors in human platelets. *Anthony S. Hajek, J. Heinrich Joist, R. Kendall Baker, Leonard Jarett, and William H. Daughaday*

1066 Regulation of the interaction of purified human erythrocyte AMP deaminase and the human erythrocyte membrane. *George M. Pipoly, Gene R. Nathans, Donald Chang, and Thomas F. Deuel*

1077 Inhibition of the action of nonsuppressible insulin-like activity on isolated rat fat cells by binding to its carrier protein. *J. Zapf, E. Schoenle, G. Jagars, I. Sand, J. Grunwald, and E. R. Froesch*

RAPID PUBLICATIONS

1085 Association of HLA-DRw2 with autoimmune thrombocytopenic purpura. *S. Karpatkin, M. Fotino, A. Gibofsky, and R. J. Winchester*

1089 Inhibition of prostacyclin by treatment of endothelium with aspirin. Correlation with platelet adherence. *Robert L. Czervionke, J. Bryan Smith, Glenna L. Fry, John C. Hoak, and Donna L. Haycraft*

1094 MAY AUTHOR INDEX

JUNE 1979 VOLUME 63 NUMBER 6

1095 Insulin secretion and metabolism during the perinatal period in the rat. Evidence for a placental role in fetal hyperinsulinemia. *Françoise R. Sodoyez-Goffaux, Jean C. Sodoyez, and Claudine J. De Vos*

1103 Effect of hypersensitivity on protein uptake across the air-blood barrier of isolated rabbit lungs. *Janet F. Braley, Laurence B. Peterson, Christopher A. Dawson, and Vernon L. Moore*

1110 Effects of glucose and parathyroid hormone on the renal handling of myoinositol by isolated perfused dog kidneys. *B. A. Molitoris, K. A. Hruska, N. Fishman, and W. H. Daughaday*

1119 Effect of intermittent endogenous hyperglucagonemia on glucose homeostasis in normal and diabetic man. *Robert Rizza, Carlos Verdonk, John Miles, F. John Service, and John Gerich*

1124 Adenylate cyclase in thymus-derived and bone marrow-derived lymphocytes from normal donors and patients with chronic lymphocytic leukemia. *John Mendelsohn and Judith Nordberg*

1133 Catecholamine-mediated reduction in uterine blood flow after nicotine infusion in the pregnant ewe. *Robert Resnik, Gary W. Brink, and Mahlon Wilkes*

1137 Reversible phagocytosis in rabbit polymorphonuclear leukocytes. *R. D. Berlin, J. P. Fera, and J. R. Pfeiffer*

1145 Observations on the factors that control the generation of triiodothyronine from thyroxine in rat liver and the nature of the defect induced by fasting. *Alan Balsam and Sidney H. Ingbar*

1157 Inhibition of humoral and cell-mediated immune responses in man by distinct suppressor cell systems. *Peter I. Lobo and Clinton E. Spencer*

1164 Association of poly(adenosine diphosphoribose) synthesis with DNA damage and repair in normal human lymphocytes. *Nathan A. Berger, Georgina W. Sikorski, Shirley J. Petzold, and Kevin K. Kurohara*

1172 Beta-adrenergic potentiation of the increased in vitro accumulation of cycloleucine by rat thymocytes induced by triiodothyronine. *James Etzkorn, Patricia Hopkins, Janet Gray, Joseph Segal, and Sidney H. Ingbar*

1181 Specific inhibition of the polymorphonuclear leukocyte chemotactic response to hydroxy-fatty acid metabolites of arachidonic acid by methyl ester derivatives. *Edward J. Goetzl, Frank H. Valone, Vernon N. Reinhold, and Robert R. Gorman*

1187 Intravascular clearance of parasitized erythrocytes in rodent malaria. *Thomas C. Quinn and David J. Wyler*

1195 Complement-dependent histaminase release from human granulocytes. *James J. Herman, Ingrid K. Rosner, Alvin E. Davis III, Robert S. Zeiger, M. Amin Arnaout, and Harvey R. Colten*

1203 Evidence for an intrinsic renal tubular defect in mice with genetic hypophosphatemic rickets. *Larry D. Cowgill, Stanley Goldfarb, Kai Lau, Eduardo Slatopolsky, and Zalman S. Agus*

1211 Thrombin-induced platelet secretion. Further evidence for a specific pathway. *M. A. Shuman, M. Botney, and J. W. Fenton, II*

1219 Interference with the mannose binding and epithelial cell adherence of *Escherichia coli* by sublethal concentrations of streptomycin. *Barry I. Eisenstein, Itzhak Ofek, and Edwin H. Beachey*

1229 Relationship of receptor affinity to the modulation of thyroid hormone nuclear receptor levels and growth hormone synthesis by L-triiodothyronine and iodothyronine analogues in cultured GH_1 cells. *Herbert H. Samuels, Frederick Stanley, and Juan Casanova*

1241 Rapid distribution of tryptophol (3-indole ethanol) to the brain and other tissues. *Eain M. Cornford, William D. Bocash, Leon D. Braun, Paul D. Crane, William H. Oldendorf, and Austin J. MacInnis*

1249 Lysosomal association of internalized ^{125}I-insulin in isolated rat hepatocytes. Direct demonstration by quantitative electron microscopic autoradiography. *Jean-Louis Carpentier, Phillip Gorden, Pierre Freychet, Alphonse Le Cam, and Lelio Orci*

1262 Kinetic model for production and metabolism of very low density lipoprotein triglycerides. Evidence for a slow production pathway and results for normolipidemic subjects. *Loren A. Zech, Scott M. Grundy, Daniel Steinberg, and Mones Berman*

1274 Transport of very low density lipoprotein triglycerides in varying degrees of obesity and hypertriglyceridemia. *Scott M. Grundy, Henry Y. I. Mok, Loren Zech, Daniel Steinberg, and Mones Berman*

1284 Role of microtubules in the synthesis, conversion, and release of (pro)insulin. A biochemical and radioautographic study in rat islets. *F. Malaisse-Lagae, M. Amherdt, M. Ravazzola, A. Sener, J. C. Hutton, L. Orci, and W. J. Malaisse*

RAPID PUBLICATIONS

1297 Distribution of β-endorphin immunoreactivity in normal human pituitary. *Geoffrey Mendelsohn, Richard D'Agostino, Joseph C. Eggleston, and Stephen B. Baylin*

1302 Delayed-type hypersensitivity skin reactions in congenital afibrinogenemia lack fibrin deposition and induration. *Robert B. Colvin, Michael W. Mosesson, and Harold F. Dvorak*

1307 Organization of the α-globin genes in the Chinese α-thalassemia syndromes. *Stephen H. Embury, Roger V. Lebo, Andrée M. Dozy, and Yuet Wai Kan*

SUBJECT INDEX

A

Abortion
Fibrin fibrinogen degradation products
Blood coagulation disorders, 1371

4-Acetamino-4′-iso-thiocyanato-stilbene-2,2′-disulfonic acid
Chloride ion
Kidney tubules, proximal, 570

Acetates
Age factors
Oxidation, 708
Plasma levels, 708
Carbon dioxide
Metabolism, 708
Gastrointestinal system
Metabolism, 708
Neoplasms
Metabolism, 708
Oxidation, 708
Plasma levels, 708

Acetazolamide
Chloride ion
Kidney tubules, proximal, 570

Acetic acid, (ethylenebis(oxyethylenenitrilo))tetra-
Calcium
Erythropoiesis, 1573

Acetic acid, 4-hydroxyphenyl-
Liver cirrhosis
Metabolism, 413

Acetylglucosaminidase
Exocytosis
Liver, rat, 948
Lysosomes
Bile excretion, rat, 948

Acetylsalicylic acid
Thromboembolism
Animal model, baboon, 559

Acidemia
Biotin
Carboxy-lyases, 1695
Coenzyme A
Fibroblasts, 1695
Methylmalonic acid
Hyperammonemia, 1544
Propionic acids
Carboxy-lyases, 1695
Hyperammonemia, 1544
Pyruvate carboxylase
Fibroblasts, 1695

Acidosis
Bicarbonate
Glomerular filtration rate, 1168
Reabsorption, 1168

Acidosis (cont'd)
Carbon dioxide
Glomerular filtration rate, 1168

Aciduria
Adipic acids
Fatty acid desaturases, 1580
Ethylmalonic acid
Fatty acid desaturases, 1580
Fatty acid desaturases
Flavoproteins, 1580
Glutarates
Fatty acid desaturases, 1580

Actinomycin D
Alkaline phosphatase
Kidney cortex, 955
Calcium
Metabolism, rat, 955
Glutamyl transpeptidase
Kidney cortex, 955
Leucine aminopeptidase
Kidney cortex, 955
Phosphate
Metabolism, rat, 955

Acyl coenzyme A
Glutamate synthetase
Hyperammonemia, 1544
Mitochondria, liver, 1544
Metabolism, inborn errors
Mitochondria, liver, 1544
Propionic acids
Glutamate synthetase, 1544

Acyl coenzyme A dehydrogenases
see Fatty acid desaturases

Acyltransferases
Clofibrate
Liver, 405
Muscles, 405

Adenoma
Pituitary neoplasms
Prolactin, 1669

Adenosine cyclic-3′,5′-monophosphate
Basophils
Kallikrein, 466
Catecholamines
Plasma levels, 1221
Enterotoxins
Fibroblasts, 381
Epinephrine
Insulin, 1357
Erythrocyte membrane
Protein kinase, 534
Insulin
Glomeruli, rat, 1357
Intrinsic factor
Gastric mucosa, 1044
3-Isobutyl-1-methylxanthine
Intrinsic factor, 1044

Adenosine cyclic-3′,5′-monophosphate (cont'd)
Kidney glomerulus
Receptors, insulin, 1357
Magnesium deficiency
Bone, 1238
Parathyroid hormone
Bone, 1238
Prostaglandins E
Insulin, 1357
T Lymphocytes, 1188

Adenosine deaminase
Enzyme deficiency
Case report, 1130
Erythrocytes
Enzyme deficiency, 1130
Radioimmunoassay, 798
Genetics
Metabolism, 1130
Immunologic deficiency syndromes
Deoxyribonucleosides, 1475
Erythrocytes, 798
Genetics, 798
Metabolism, 1130

Adenosine, 2′-deoxy-
T Lymphocytes
DNA replication, 1475

Adenosine diphosphate
Fibrinogen
Platelet aggregation, 1393

Adenosine phosphatase
Barbituric acid, 5-ethyl-5-phenyl-
Cell membrane, 1590
Cortisone acetate
Cell membrane, 1590
Ethinyl estradiol
Cell membrane, 1590
Membrane fluidity
Liver, rat, 1590
Phenobarbital
Cell membrane, 1590
Potassium
Biological transport, 1590
Propylene glycol
Cell membrane, 1590
Sodium
Biological transport, 1590

Adenosine triphosphatase
Gastric mucosa
Antigen-antibody reactions, 627
Hydrogen ions, 627
Isolation and characterization 627
Membrane proteins, 627
Hydrogen ions
Biological transport, 627
Lymphocytes
Cell membrane permeability, 834

Adenosine triphosphatase (cont'd)
Plant agglutinins, 834
Uremia
Potassium, 1033

Adenosine triphosphate
Vitamin D_3
Muscles, 1157

Adenyl cyclase
Catecholamines
Adipose tissue, 609
Prostaglandins E, 609

Adipic acids
Aciduria
Fatty acid desaturases, 1580

Adipose tissue
Adenyl cyclase
Prostaglandins E, 609
Catecholamines
Adenyl cyclase, 609
Epinephrine
Vasoconstriction, 1221
Guanosine triphosphate
Prostaglandins E, 609
Prostaglandins E
Antilipolytic effect, 609
Cell membrane, 609

Adrenal medulla
Diabetic neuropathies
Epinephrine, 374
Edrophonium
Epinephrine, 374

Adrenalectomy
Edrophonium
Epinephrine, 374
Norepinephrine, 374

Adrenergic beta receptor agonists
Renin
Secretion, rat, 448

Age factors
Acetates
Oxidation, 708
Plasma levels, 708

Aging
Calcium
Intestinal absorption, 729
β Cells
Insulin, 591
25-Hydroxyvitamin D
Metabolism, 729
Indomethacin
Lymphocyte transformation, 434
T lymphocytes
Autoimmune disease, 695
Subpopulation distribution, 695
Prostaglandins E
Lymphocyte transformation, 434
Prostatic hypertrophy
5α-Androstane-3α,17β-diol, 842
Dihydrotestosterone, 842
Estradiol, 842

Airway obstruction
Asthma
Oxygen, 541

Alanine
Parathyroid hormone
Gluconeogenesis, 1016

Aldosterone
Hypertension
Angiotensin II, 1270
Indomethacin
Angiotensins, 1552
Serum levels, 1552
Meclofenamate
Angiotensins, 1552
Uremia
Plasma levels, 1033

Alkaline phosphatase
Actinomycin D
Kidney cortex, 955
Cycloheximide
Kidney cortex, 955
Phosphate
Diet, 955

Alpha$_2$-acute phase globulins
see also Alpha macroglobulins
Alpha$_2$ HS glycoprotein

Statement of Ownership, Management, and Circulation required by Act of 12 August 1970: Section 3685, Title 39, United States Code: *The Journal of Clinical Investigation*. Produced monthly by The Rockefeller University Press at 1230 York Avenue, New York 10021 for The American Society for Clinical Investigation, Houston, Texas 77025. Editor: Philip W. Majerus, Washington University School of Medicine, St. Louis, Missouri 63110. Owned by The American Society for Clinical Investigation, Houston, Texas 77025, nonprofit corporation, authorized to mail at special rates. Purpose, function, and nonprofit status of the organization and the exempt status for Federal income tax purposes have not changed during the preceding 12 months. The following statistics represent the average number of copies for each issue during the preceding 12 months: copies printed for each issue, 7235; sales through dealers, street vendors, counter sales, 0; mail subscriptions, 6023; total paid circulation, 6023; free subscriptions, 14; office use, left-over, unaccounted for, spoiled, 1198; net press run, 7235. The following statistics represent the actual number of copies of the single issue published nearest to date of filing: copies printed, 7000; sales through dealers, street vendors, counter sales, 0; mail subscriptions, 6630; total paid circulation, 6630; free subscriptions, 17; office use, left-over, unaccounted for, spoiled, 353; net press run, 7000. Single issue nearest filing date, October 1979.

JULY 1979 VOLUME 64 NUMBER 1

1 Mechanisms of renin secretion during hemorrhage in the dog. *William L. Henrich, Robert W. Schrier, and Tomas Berl*

8 Modulating influence of chemotactic factor-induced cell adhesiveness on granulocyte function. *Jorg Fehr and Clemens Dahinden*

17 Mechanism of postarrhythmic renal vasoconstriction in the anesthetized dog. *Richard E. Katholi, Suzanne Oparil, Ferdinand Urthaler, and Thomas N. James*

32 Increased glycosaminoglycan accumulation as a genetic characteristic in cell cultures of one variety of dominant dystrophic epidermolysis bullosa. *Eugene A. Bauer, William K. Fiehler, and Nancy B. Esterly*

40 Synthesis of hemoglobin A_{Ic} and related minor hemoglobins by erythrocytes. In vitro study of regulation. *Kenneth M. Spicer, Robert C. Allen, David Hallett, and Maria G. Buse*

49 Ionophore and arachidonic acid stimulation of airway responses in rhesus monkeys. *Roy Patterson, Kathleen E. Harris, and Paul A. Greenberger*

56 Modulation of in vitro erythropoiesis. Studies with euthyroid and hypothyroid dogs. *William J. Popovic, James E. Brown, and John W. Adamson*

62 Role of glucagon, catecholamines, and growth hormone in human glucose counterregulation. Effects of somatostatin and combined α- and β-adrenergic blockade on plasma glucose recovery and glucose flux rates after insulin-induced hypoglycemia. *Robert A. Rizza, Philip E. Cryer, and John E. Gerich*

72 Neutropenia in three patients with rheumatic disorders. Suppression of granulopoiesis by cortisol-sensitive thymus-dependent lymphocytes. *Grover C. Bagby, Jr. and John D. Gabourel*

83 Kinetics of the normal folate enterohepatic cycle. *Stephen E. Steinberg, Caryl L. Campbell, and Robert S. Hillman*

89 In vitro effects of adenosine on lymphocytes and erythrocytes from horses with combined immunodeficiency. *Nancy S. Magnuson and Lance E. Perryman*

102 Positive rate-sensitive corticosteroid feedback mechanism of ACTH secretion in Cushing's disease. *H. L. Fehm, K. H. Voigt, G. Kummer, and E. F. Pfeiffer*

109 Sympathoadrenal activity in fasting pregnant rats. Dissociation of adrenal medullary and sympathetic nervous system responses. *James B. Young and Lewis Landsberg*

117 Inhibition of intrapituitary thyroxine to 3,5,3′-triiodothyronine conversion prevents the acute suppression of thyrotropin release by thyroxine in hypothyroid rats. *P. R. Larsen, T. E. Dick, B. P. Markovitz, M. M. Kaplan, and T. G. Gard*

129 Lactic acidosis as a result of iron deficiency. *Clement A. Finch, Philip D. Gollnick, Michael P. Hlastala, Louise R. Miller, Erick Dillmann, and Bruce Mackler*

138 Membrane fluidity in human and mouse Chediak-Higashi leukocytes. *Richard A. Haak, Leah M. Ingraham, Robert L. Baehner, and Laurence A. Boxer*

145 Transport of steroid hormones through the rat blood-brain barrier. Primary role of albumin-bound hormone. *William M. Pardridge and Lawrence J. Mietus*

155 Creatine kinase release, potassium-42 content, and mechanical performance in anoxic rabbit myocardium. *Gary L. Conrad, Eric E. Rau, and Kenneth I. Shine*

162 Quantitation of the transfer of surface phospholipid of chylomicrons to the high density lipoprotein fraction during the catabolism of chylomicrons in the rat. *T. G. Redgrave and D. M. Small*

172 Sex differences in long chain fatty acid utilization and fatty acid binding protein concentration in rat liver. *Robert K. Ockner, David A. Burnett, Nina Lysenko, and Joan A. Manning*

182 Influence of thyroid status on lipid metabolism in the perfused rat liver. *William G. Keyes and Murray Heimberg*

191 Circulating DNA:anti-DNA complexes in systemic lupus erythematosus. Detection and characterization by ultracentrifugation. *Charles Bruneau and Jacques Benveniste*

199 Role of cerebrospinal fluid $[H^+]$ in ventilatory deacclimatization from chronic hypoxia. *J. A. Dempsey, H. V. Forster, G. E. Bisgard, L. W. Chosy, P. G. Hanson, A. L. Kiorpes, and D. A. Pelligrino*

206 Regulation of the metabolism of 25-hydroxyvitamin D_3 in primary cultures of chick kidney cells. *U. Trechsel, J-P. Bonjour, and H. Fleisch*

218 Evidence that increased circulating 1_{α},25-dihydroxyvitamin D is the probable cause for abnormal calcium metabolism in sarcoidosis. *Norman H. Bell, Paula H. Stern, Elizabeth Pantzer, Tushar K. Sinha, and Hector F. DeLuca*

226 Modulation of neutrophil function by lysozyme. Potential negative feedback system of inflammation. *Leo I. Gordon, Steven D. Douglas, Neil E. Kay, Osamu Yamada, Elliott F. Osserman, and Harry S. Jacob*

233 Human intestinal lipoproteins. Studies in chyluric subjects. *Peter H. R. Green, Robert M. Glickman, Christopher D. Saudek, Conrad B. Blum, and Alan R. Tall*

243 Pattern of insulin delivery after intravenous glucose injection in man and its relation to plasma glucose disappearance. *Eleuterio Ferrannini and Alessandro Pilo*

255 Serum inhibitor of C5 fragment-mediated polymorphonuclear leukocyte chemotaxis associated with chronic hemodialysis. *Simeon E. Goldblum, Dennis E. Van Epps, and William P. Reed*

265 In vitro and in vivo refractoriness to thyrotropin stimulation of iodine organification and thyroid hormone secretion. *James B. Field, Andrew Dekker, Gail Titus, Mary Eleanor Kerins, William Worden, and Rosalyn Frumess*

272 Bovine antigens and the formation of circulating immune complexes in selective immunoglobulin A deficiency. *Charlotte Cunningham-Rundles, Werner E. Brandeis, Robert A. Good, and Noorbibi K. Day.*

280 Response of variant hereditary angioedema phenotypes to danazol therapy. Genetic implications. *James E. Gadek, Stephen W. Hosea, Jeffrey A. Gelfand, and Michael M. Frank*

287 Dopamine inhibits angiotensin-stimulated aldosterone biosynthesis in bovine adrenal cells. *Terence J. Mc Kenna, Donald P. Island, Wendell E. Nicholson, and Grant W. Liddle*

292 Metabolic studies in an unusual case of asymptomatic familial hypobetalipoproteinemia with hypoalphalipoproteinemia and fasting chylomicronemia. *Daniel Steinberg, Scott M. Grundy, Henry Y. I. Mok, John D. Turner, David B. Weinstein, W. Virgil Brown, and John J. Albers*

302 Suppression of acute and chronic inflammation in tumor-bearing rats. *John P. Brozna and Peter A. Ward*

312 Sodium taurocholate modifies the bile acid-independent fraction of canalicular bile flow in the Rhesus monkey. *Alfred L. Baker, R. A. B. Wood, A. R. Moossa, and James L. Boyer*

RAPID PUBLICATIONS

321 Antigenic modulation and turnover in human neutrophils. *Sigmund A. Weitzman, Mary C. Desmond, and Thomas P. Stossel*

326 Effect of heat on the circular dichroism of spectrin in hereditary pyropoikilocytosis. *Katherine Chang, Joseph R. Williamson, and Harold S. Zarkowsky*

329 Effect of thrombin on the fibrinolytic activity of cultured bovine endothelial cells. *David J. Loskutoff*

333 Antipili antibody affords protection against experimental ascending pyelonephritis. *Fredric J. Silverblatt and L. Steven Cohen*

337 Production of hybridomas secreting monoclonal antibodies against the lymphokine osteoclast activating factor. *Richard A. Luben, Marjorie A. Mohler, and Glenn E. Nedwin*

PRESIDENTIAL ADDRESS

342 A society without an obvious future: Can elitism help? *Kenneth L. Melmon*

350 JULY AUTHOR INDEX

AUGUST 1979 VOLUME 64 NUMBER 2

351 Selective depression of the xenogeneic cell-mediated lympholysis in systemic lupus erythematosus. *B. Charpentier, C. Carnaud, and J. F. Bach*

361 Chick embryo pancreatic transplants reverse experimental diabetes of rats. *R. Eloy, K. Haffen, M. Kedinger, and J. F. Grenier*

374 Cholinergic stimulation of norepinephrine release in man. Evidence of a sympathetic postganglionic axonal lesion in diabetic adrenergic neuropathy. *Steven A. Leveston, Suresh D. Shah, and Philip E. Cryer*

381 Gangliosides sensitize unresponsive fibroblasts to *Escherichia coli* heat-labile enterotoxin. *Joel Moss, Sam Garrison, Peter H. Fishman, and Stephen H. Richardson*

385 Hyper immunoglobulin M immunodeficiency (dysgammaglobulinemia). Presence of immunoglobulin M-secreting plasmacytoid cells in peripheral blood and failure of immunoglobulin M-immunoglobulin G switch in B-cell differentiation. *Raif S. Geha, Newton Hyslop, Samih Alami, Fuad Farah, Eveline E. Schneeberger, and Fred S. Rosen*

392 Subset derivation of T-cell acute lymphoblastic leukemia in man. *Ellis L. Reinherz, Lee M. Nadler, Stephen E. Sallan, and Stuart F. Schlossman*

398 Endocrine consequences of continuous antiestrogen therapy with tamoxifen in premenopausal women. *Barry M. Sherman, Frederick K. Chapler, Kent Crickard, and Dorothy Wycoff*

405 Paradoxical effects of clofibrate on liver and muscle metabolism in rats. Induction of myotonia and alteration of fatty acid and glucose oxidation. *Harbhajan S. Paul and Siamak A. Adibi*

413 Tyramine kinetics and metabolism in cirrhosis. *Bahjat A. Faraj, J. Timothy Fulenwider, Eric B. Rypins, Bernard Nordlinger, George L. Ivey, Robert D. Jansen, Farouk M. Ali, Vernon M. Camp, Michael Kutner, Fred Schmidt, and Daniel Rudman*

421 Effects of experimental right ventricular hypertrophy on myocardial blood flow in conscious dogs. *Paul A. Murray, Hank Baig, Michael C. Fishbein, and Stephen F. Vatner*

428 Complement lysis of human erythrocytes. Differing susceptibility of two types of paroxysmal nocturnal hemoglobinuria cells to C5b-9. *Charles H. Packman, Stephen I. Rosenfeld, David E. Jenkins, Jr., Patricia A. Thiem, and John P. Leddy*

434 Sensitivity of lymphocytes to prostaglandin E_2 increases in subjects over age 70. *James S. Goodwin and Ronald P. Messner*

440 Effects of carnitine in ischemic and fatty acid supplemented swine hearts. *A. James Liedtke and Stephen H. Nellis*

448 Role of renal prostaglandins in sympathetically mediated renin release in the rat. *William B. Campbell, Robert M. Graham, and Edwin K. Jackson*

457 Anaphylactic release of a basophil kallikrein-like activity. I. Purification and characterization. *Harold H. Newball, Ronald W. Berninger, Richard C. Talamo, and Lawrence M. Lichtenstein*

466 Anaphylactic release of a basophil kallikrein-like activity. II. A mediator of immediate hypersensitivity reactions. *Harold H. Newball, Richard C. Talamo, and Lawrence M. Lichtenstein*

476 Micropuncture determination of pH, P_{CO_2}, and total CO_2 concentration in accessible structures of the rat renal cortex. *Thomas D. DuBose, Jr., Leo R. Pucacco, Marjory S. Lucci, and Norman W. Carter*

483 Reconstitution of spectrin-deficient, spherocytic mouse erythrocyte membranes. *Stephen B. Shohet*

495 Effect of prostaglandin E_2 on chloride transport across the rabbit thick ascending limb of Henle. Selective inhibition of the medullary portion. *John B. Stokes*

503 Glomerular hemodynamics in rats with chronic sodium depletion. Effect of Saralasin. *Robert W. Steiner, Bryan J. Tucker, and Roland C. Blantz*

513 Effects of reduced renal mass and dietary protein intake on amino acid release and glucose uptake by rat muscle in vitro. *Herschel R. Harter, Irene E. Karl, Saulo Klahr, and David M. Kipnis*

524 Metabolic studies in familial hypercholesterolemia. Evidence for a gene-dosage effect in vivo. *David W. Bilheimer, Neil J. Stone, and Scott M. Grundy*

534 Catecholamine regulation of human erythrocyte membrane protein kinase. *Takuji Tsukamoto and Martin Sonenberg*

541 A critical assessment of the mechanism by which hyperoxia attenuates exercise-induced asthma. *Arthur D. Resnick, E. Chandler Deal, Jr., R. H. Ingram, Jr., and E. R. McFadden, Jr.*

550 Effect of volume expansion on hemodynamics of the hypoperfused rat kidney. *Paul A. Johnston, David B. Bernard, John F. Donohoe, Nancy S. Perrin, and Norman G. Levinsky*

559 Experimental arterial thromboembolism in baboons. Mechanism, quantitation, and pharmacological prevention. *Laurence A. Harker and Stephen R. Hanson*

570 Effects of anion-transport inhibitors on NaCl reabsorption in the rat superficial proximal convoluted tubule. *Marjory S. Lucci and David G. Warnock*

580 Neutropenia, inflammation, and the kinetics of transfused neutrophils in rabbits. *Marc S. Rosenshein, Thomas H. Price, and David C. Dale*

586 Characterization of the platelet prostaglandin D_2 receptor. Loss of prostaglandin D_2 receptors in platelets of patients with myeloproliferative disorders. *Barry Cooper and David Ahern*

591 Effect of age on glucose-stimulated insulin release by the β-cell of the rat. *Eve P. Reaven, Gerald Gold, and Gerald M. Reaven*

600 Changes in sedimentation of surfactant in ventilated excised rat lungs. Physical alterations in surfactant associated with the development and reversal of atelectasis. *Lyn Aung Thet, Linda Clerch, Gloria D. Massaro, and Donald Massaro*

609 Biphasic effects of prostaglandin E_2 on the human fat cell adenylate cyclase. *Horst Kather and Bernd Simon*

613 Conditioning effects of chronic infusions of dobutamine. Comparison with exercise training. *Chang-seng Liang, Ronald R. Tuttle, William B. Hood, Jr., and Haralambos Gavras*

620 Reflex cardiovascular depression during unilateral lung hyperinflation in the dog. *Sharon S. Cassidy, William L. Eschenbacher, and Robert L. Johnson, Jr.*

627 An acid transporting enzyme in human gastric mucosa. *Gaetano Saccomani, Hsuan H. Chang, Anastasios A. Mihas, Sylvia Crago, and George Sachs*

636 Concentrations of insulin and of insulin receptors in the brain are independent of peripheral insulin levels. Studies of obese and streptozotocin-treated rodents. *Jana Havrankova, Jesse Roth, and Michael J. Brownstein*

643 Aortic input impedance during nitroprusside infusion. A reconsideration of afterload reduction and beneficial action. *Carl J. Pepine, W. W. Nichols, R. C. Curry, Jr., and C. Richard Conti*

655 Altered mineral metabolism in glucocorticoid-induced osteopenia. Effect of 25-hydroxyvitamin D administration. *Theodore J. Hahn, Linda R. Halstead, Steven L. Teitelbaum, and Bevra H. Hahn*

666 Role of cytochrome P-450 in alveolar hypoxic pulmonary vasoconstriction in dogs. *Matthew A. Miller and Charles A. Hales*

674 Secretion of cholesterol-rich lipoproteins by perfused livers of hypercholesterolemic rats. *Simon-Pierre Noel, Laurence Wong, Peter J. Dolphin, Ladislav Dory, and David Rubinstein*

RAPID PUBLICATIONS

684 Osmotic blood-brain barrier disruption. Computerized tomographic monitoring of chemotherapeutic agent delivery. *Edward A. Neuwelt, Kenneth R. Maravilla, Eugene P. Frenkel, Stanley I. Rapoport, Suellen A. Hill, and Peggy A. Barnett*

689 Serotonin and the control of ventilation in awake rats. *E. B. Olson, Jr., J. A. Dempsey, and D. R. McCrimmon*

694 AUGUST AUTHOR INDEX

SEPTEMBER 1979 VOLUME 64 NUMBER 3

695 Immunological abnormalities of aging. An analysis of T lymphocyte subpopulations of Werner's syndrome. *Makoto Goto, Yoshihiko Horiuchi, Ko Okumura, Tomio Tada, Makoto Kawata, and Keibun Ohmori*

700 Glucose memory of pancreatic B and A_2 cells. Evidence for common time-dependent actions of glucose on insulin and glucagon secretion in the perfused rat pancreas. *Valdemar Grill, Ulf Adamson, Margareta Rundfeldt, Sten Andersson, and Erol Cerasi*

708 Plasma acetate turnover and oxidation. *C. L. Skutches, C. P. Holroyde, R. N. Myers, P. Paul, and G. A. Reichard*

714 Lymphocytes with immunoglobulin E Fc receptors in patients with atopic disorders. *H. L. Spiegelberg, R. D. O'Connor, R. A. Simon, and D. A. Mathison*

721 Properdin factor D. Effects on thrombin-induced platelet aggregation. *Alvin E. Davis, III and Dianne M. Kenney*

729 Intestinal calcium absorption and serum vitamin D metabolites in normal subjects and osteoporotic patients. Effect of age and dietary calcium. *J. C. Gallagher, B. Lawrence Riggs, John Eisman, Alan Hamstra, Sara B. Arnaud, and Hector F. DeLuca*

737 Measurement, characterization, and source of somatostatin-like immunoreactivity in human amniotic fluid. *David Fitz-Patrick and Yogesh C. Patel*

743 Altered metabolism (in vivo and in vitro) of plasma lipoproteins after selective chemical modification of lysine residues of the apoproteins. *Robert W. Mahley, Thomas L. Innerarity, Karl H. Weisgraber, and Suk Y. Oh*

751 Heterogeneity of DNA fragments associated with the sickle-globin gene. *John Feldenzer, J. Gregory Mears, A. Lee Burns, Clayton Natta, and Arthur Bank*

756 Elevated cholesterol and bile acid synthesis in a young patient with homozygous familial hypercholesterolemia. *Kathleen B. Schwarz, Joseph Witztum, Gustav Schonfeld, Scott M. Grundy, and William E. Connor*

761 Human plasma protein C. Isolation, characterization, and mechanism of activation by α-thrombin. *Walter Kisiel*

770 Relationship between alveolar P_{O_2} and the rate of *p*-nitroanisole *O*-demethylation by the cytochrome P-450 pathway in isolated rabbit lungs. *A. B. Fisher, N. Itakura, C. Dodia, and R. G. Thurman*

775 Mechanism of action of colchicine in acute urate crystal-induced arthritis. *Isaias Spilberg, Brian Mandell, Jagdish Mehta, Louis Simchowitz, and David Rosenberg*

781 Cross-linking of fibronectin to collagen by blood coagulation Factor $XIII_a$. *Deane F. Mosher, Peter E. Schad, and Hynda K. Kleinman*

788 Mechanism of synergistic cell killing when methotrexate precedes cytosine arabinoside. Study of L1210 and human leukemic cells. *Ed Cadman and Fern Eiferman*

798 Radioimmunochemical quantitation of human adenosine deaminase. *Peter E. Daddona, Michael A. Frohman, and William N. Kelley*

804 Anaphylatoxin-induced histamine release with human leukocytes. Studies of C3a leukocyte binding and histamine release. *M. M. Glovsky, T. E. Hugli, T. Ishizaka, L. M. Lichtenstein, and B. W. Erickson*

812 Prostaglandin E inhibition of T-lymphocyte colony formation. A possible mechanism of monocyte modulation of clonal expansion. *R. S. Bockman and M. Rothschild*

820 Characterization of a distinct nuclear acidic protein antigen (MA) and clinical findings in systemic lupus erythematosus patients with MA antibodies. *Donna M. Winn, J. Frederick Wolfe, Debra Harmon, and Gordon C. Sharp*

824 Receptor-mediated binding and internalization of leukocyte elastase by alveolar macrophages in vitro. *Edward J. Campbell, Richard R. White, Robert M. Senior, Rafael J. Rodriguez, and Charles Kuhn*

834 Regulation of sodium and potassium transport in phytohemagglutinin-stimulated human blood lymphocytes. *George B. Segel, William Simon, and Marshall A. Lichtman*

842 Comparison of spontaneous and experimentally induced canine prostatic hyperplasia. *D. P. DeKlerk, D. S. Coffey, L. L. Ewing, I. R. McDermott, W. G. Reiner, C. H. Robinson, W. W. Scott, J. D. Strandberg, P. Talalay, P. C. Walsh, L. G. Wheaton, and B. R. Zirkin*

850 Excretion and metabolism of catecholamines by the isolated perfused rat kidney. *Patricio Silva, Lewis Landsberg, and Anatole Besarab*

858 Genetic control of the eighth component of complement. *Donald Raum, M. Anne Spence, Diane Balavitch, Susan Tideman, A. Donald Merritt, R. Thomas Taggart, Bruce H. Petersen, Noorbibi K. Day, and Chester A. Alper*

RAPID PUBLICATION

866 Deletion of the A_γ-globin gene in G_γ-δβ-thalassemia. *Stuart H. Orkin, Blanche P. Alter, and Cigdem Altay*

870 SEPTEMBER AUTHOR INDEX

871 Evidence for the synthesis and release of strongly immunosuppressive, noncytotoxic substances by *Streptococcus intermedius*. *Mario P. Arala-Chaves, Thomas B. Higerd, Maria Teresa Porto, Jose Munoz, Jean-Michel Goust, H. Hugh Fudenberg, and C. Boyd Loadholt*

884 Combined functional and immunochemical analysis of normal and abnormal human Factor X. *Daryl S. Fair, Edward F. Plow, and Thomas S. Edgington*

895 Temperature perturbation studies of sarcoplasmic reticulum from malignant hyperthermia pig muscle. *T. E. Nelson and David E. Bee*

902 Neutrophil-binding immunoglobulin G in systemic lupus erythematosus. Evidence for presence of both soluble immune complexes and immunoglobulin G antibodies to neutrophils. *Gordon Starkebaum and William P. Arend*

913 Chemotactic factor inactivation by the myeloperoxidase-hydrogen peroxide-halide system. An inflammatory control mechanism. *Robert A. Clark and Seymour J. Klebanoff*

921 Scleroderma. Increased biosynthesis of triple-helical type I and type III procollagens associated with unaltered expression of collagenase by skin fibroblasts in culture. *Jouni Uitto, Eugene A. Bauer, and Arthur Z. Eisen*

931 Staphylococci-induced human platelet injury mediated by protein A and immunoglobulin G Fc fragment receptor. *Jack Hawiger, Sylvia Steckley, Dianne Hammond, Charles Cheng, Sheila Timmons, Alan D. Glick, and Roger M. Des Prez*

938 Public antigenic determinant on a family of HLA-B molecules. Basis for cross-reactivity and a possible link with disease predisposition. *Benjamin D. Schwartz, Lisa K. Luehrman, and Glenn E. Rodey*

948 Coordinate secretion of acid hydrolases in rat bile. Hepatocyte exocytosis of lysosomal protein? *Nicholas F. LaRusso and Stanley Fowler*

955 Renal adaptation to a low phosphate diet in rats. Blockade by actinomycin D. *Sudhir V. Shah, Stephen A. Kempson, Thomas E. Northrup, and Thomas P. Dousa*

967 Recognition of hapten-modified cells in vitro by human T lymphocytes. *Michael F. Seldin, Robert R. Rich, and Stuart L. Abramson*

977 Metabolic fate of chylomicron phospholipids and apoproteins in the rat. *Alan R. Tall, Peter H. R. Green, Robert M. Glickman, and John W. Riley*

990 Studies of human cord blood and adult lymphocyte interactions with in vitro immunoglobulin production. *T. Morito, A. D. Bankhurst, and R. C. Williams, Jr.*

996 Stimulation of neutrophil oxygen-dependent metabolism by human leukocytic pyrogen. *Mark S. Klempner, Charles A. Dinarello, William R. Henderson, and John I. Gallin*

1003 Concentration of dihydrotestosterone and 3α-androstanediol in naturally occurring and androgen-induced prostatic hyperplasia in the dog. *Ronald J. Moore, John M. Gazak, James F. Quebbeman, and Jean D. Wilson*

1011 Insulin binding to monocytes in trained athletes. Changes in the resting state and after exercise. *Veikko A. Koivisto, Vijay Soman, Patricia Conrad, Rosa Hendler, Ethan Nadel, and Philip Felig*

1016 Effect of intact parathyroid hormone on hepatic glucose release in the dog. *Keith A. Hruska, Joan Blondin, Raymond Bass, Julio Santiago, Lorraine Thomas, Paul Altsheler, Kevin Martin, and Saulo Klahr*

1024 Modification of hemoglobin H disease by sickle trait. *Katherine K. Matthay, William C. Mentzer, Jr., Andree M. Dozy, Yuet Wai Kan, and Dorothy F. Bainton*

1033 Functional profile of the isolated uremic nephron. Potassium adaptation in the rabbit cortical collecting tubule. *Leon G. Fine, Norimoto Yanagawa, Raymond G. Schultze, Michael Tuck, and Walter Trizna*

1044 Evidence for involvement of cyclic nucleotides in intrinsic factor secretion by isolated rabbit gastric mucosa. *Cyrus R. Kapadia, David E. Schafer, Robert M. Donaldson, Jr., and Ellen R. Ebersole*

1050 Mechanisms of gas exchange abnormality in patients with chronic obliterative pulmonary vascular disease. *David R. Dantzker and James S. Bower*

1056 Activation of human Factor VII in plasma and in purified systems. Roles of activated Factor IX, kallikrein, and activated Factor XII. *Uri Seligsohn, Bjarne Østerud, Stephen F. Brown, John H. Griffin, and Samuel I. Rapaport*

1066 Pituitary gland. Site of short-loop feedback for luteinizing hormone in the rabbit. *Nilsa Patritti-Laborde, Ada R. Wolfsen, David Heber, and William D. Odell*

1070 Regulation of primate testicular luteinizing hormone receptors and steroidogenesis. *Terry F. Davies, Gary D. Hodgen, Maria L. Dufau, and Kevin J. Catt*

1074 Functional characterization of left ventricular segmental responses during the initial 24 h and 1 wk after experimental canine myocardial infarction. *Peter Roan, Floyd Scales, Shelley Saffer, L. Maximilian Buja, and James T. Willerson*

1089 Effect of anticonvulsant drugs on the rate of folate catabolism in mice. *Deirdre Kelly, Donald Weir, Berenice Reed, and John Scott*

1097 Site of substrate stimulation of jejunal sucrase in the rat. *Martin H. Ulshen and Richard J. Grand*

1103 Chlorozotocin. Mechanism of reduced bone marrow toxicity in mice. *Lawrence C. Panasci, Dianna Green, and Philip S. Schein*

1112 Phenobarbital-induced alterations in the metabolism of [^{3}H]vitamin D_3 by the perfused rachitic rat liver in vitro. *Daniel T. Baran, Aurora C. Fausto, Marilyn L. Roberts, Irene Karl, and Louis V. Avioli*

1118 Serum concentration of human alpha$_2$ HS glycoprotein during the inflammatory process. Evidence that alpha$_2$ HS glycoprotein is a negative acute-phase reactant. *Jean Pierre Lebreton, François Joisel, Jean Pierre Raoult, Bernard Lannuzel, Jean Philippe Rogez, and Guy Humbert*

1130 Erythrocyte adenosine deaminase deficiency without immunodeficiency. Evidence for an unstable mutant enzyme. *Rochelle Hirschhorn, Vivien Roegner, Trefor Jenkins, Carol Seaman, Sergio Piomelli, and William Borkowsky*

1140 OCTOBER AUTHOR INDEX

1141 Poor mixed lymphocyte reaction stimulatory capacity of leukemic B cells of chronic lymphocytic leukemia patients despite the presence of Ia antigens. *James P. Halper, Shu Man Fu, Alice B. Gottlieb, Robert J. Winchester, and Henry G. Kunkel*

1149 Radioimmunoassay of human intestinal goblet cell mucin. Investigation of mucus from different organs and species. *R. Qureshi, G. G. Forstner, and J. F. Forstner*

1157 Skeletal muscle calcium metabolism and contractile force in vitamin D-deficient chicks. *D. Pleasure, B. Wyszynski, A. Sumner, D. Schotland, B. Feldmann, N. Nugent, K. Hitz, and D. B. P. Goodman*

1168 Control of proximal bicarbonate reabsorption in normal and acidotic rats. *Martin G. Cogan, David A. Maddox, Marjory S. Lucci, and Floyd C. Rector, Jr.*

1181 Hormonal stimulation of erythropoietin production and erthropoiesis in anephric sheep fetuses. *Esmail D. Zanjani and Mussa Banisadre*

1188 Prostaglandin E modulation of the mitogenic response of human T cells. Differential response of T-cell subpopulations. *John D. Stobo, Michael S. Kennedy, and Marc E. Goldyne*

1196 δ-Aminolevulinic acid synthetase in erythroblasts of patients with pyridoxine-responsive anemia. Hypercatabolism caused by the increased susceptibility to the controlling protease. *Yosuke Aoki, Shoji Muranaka, Kiyomi Nakabayashi, and Yuzuru Ueda*

1204 Mesangial function in ureteral obstruction in the rat. Blockade of the efferent limb. *Leopoldo Raij, William F. Keane, Hartmuth Osswald, and Alfred Michael*

1213 Detection of antilymphocyte antibody with two-color method in systemic lupus erythematosus and its heterogeneous specificities against human T-cell subsets. *Kunio Okudaira, Hidenori Nakai, Tetsuo Hayakawa, Takamichi Kashiwado, Kiyoaki Tanimoto, Yoshihiko Horiuchi, and Takeo Juji*

1221 Vascular and metabolic effects of circulating epinephrine and norepinephrine. Concentration-effect study in dogs. *Paul Hjemdahl, Erik Belfrage, and Maud Daleskog*

1229 Hepatic secretion of lipoproteins in the rat and the effect of experimental nephrosis. *Julian B. Marsh and Charles E. Sparks*

1238 Evidence for skeletal resistance to parathyroid hormone in magnesium deficiency. Studies in isolated perfused bone. *Jeffrey J. Freitag, Kevin J. Martin, Mary B. Conrades, Ezequiel Bellorin-Font, Steven Teitelbaum, Saulo Klahr, and Eduardo Slatopolsky*

1245 Induction of ouabain-resistant mutation and sister chromatid exchanges in Chinese hamster cells with chemical carcinogens mediated by human pulmonary macrophages. *Ih Chang Hsu, Curtis C. Harris, Maria Yamaguchi, Benjamin F. Trump, and Paul W. Schafer*

1253 Megaloblastic anemia as a result of an abnormal transcobalamin II (Cardeza). *Farid I. Haurani, Charles A. Hall, and Ronald Rubin*

1260 Studies of immune functions of patients with systemic lupus erythematosus. T-cell subsets and antibodies to T-cell subsets. *Tsuyoshi Sakane, Alfred D. Steinberg, J. Patton Reeves, and Ira Green*

1270 Abnormal adrenal responsiveness and angiotensin II dependency in high renin essential hypertension. *Robert G. Dluhy, Sam Z. Bavli, Frank K. Leung, Harold S. Solomon, Thomas J. Moore, Norman K. Hollenberg, and Gordon H. Williams*

1277 Cortical and papillary micropuncture examination of chloride transport in segments of the rat kidney during inhibition of prostaglandin production. Possible role for prostaglandins in the chloruresis of acute volume expansion. *Eiji Higashihara, John B. Stokes, Juha P. Kokko, William B. Campbell, and Thomas D. DuBose, Jr.*

1288 Lipolysis produces changes in the immunoreactivity and cell reactivity of very low density lipoproteins. *G. Schonfeld, W. Patsch, B. Pfleger, J. L. Witztum, and S. W. Weidman*

1298 Carbohydrate of the Factor VIII/von Willebrand factor in von Willebrand's disease. *T. S. Zimmerman, R. Voss, and T. S. Edgington*

1303 Colipase enhances hydrolysis of dietary triglycerides in the absence of bile salts. *Lars Bläckberg, Olle Hernell, Gunilla Bengtsson, and Thomas Olivecrona*

1309 Low-density lipoprotein receptor activity in cultured human skin fibroblasts. Mechanism of insulin-induced stimulation. *Alan Chait, Edwin L. Bierman, and John J. Albers*

1320 Polycythemia vera. Increased expression of normal committed granulocytic stem cells in vitro after exposure to marrow of tritiated thymidine. *Jack W. Singer, Philip J. Fialkow, John W. Adamson, Laura Steinmann, Connie Ernst, Scott Murphy, and Kenneth J. Kopecky*

1325 Tubuloglomerular feedback and single nephron function after converting enzyme inhibition in the rat. *David W. Ploth, James Rudulph, Ronald LaGrange, and L. Gabriel Navar*

1336 Dietary-induced alterations in thyroid hormone metabolism during overnutrition. *Elliot Danforth, Jr., Edward S. Horton, Maureen O'Connell, Ethan A. H. Sims, Albert G. Burger, Sidney H. Ingbar, Lewis Braverman, and Apostolos G. Vagenakis*

1348 Brain cholicystokin and nutritional status in rats and mice. *Bruce S. Schneider, Joseph W. Monahan, and Jules Hirsch*

1357 Binding of ^{125}I-insulin to the isolated glomeruli of rat kidney. *Kiyoshi Kurokawa, Frederic J. Silverblatt, Keith L. Klein, Maw-Song Wang, and Roger L. Lerner*

1365 Genetic evidence for a common enzyme catalyzing the second step in the degradation of proline and hydroxyproline. *David Valle, Stephen I. Goodman, Shirley C. Harris, and James M. Phang*

1371 Sequence of fibrinogen proteolysis and platelet release after intrauterine infusion of hypertonic saline. *H. L. Nossel, J. Wasser, K. L. Kaplan, K. S. LaGamma, I. Yudelman, and R. E. Canfield*

1379 Generation of a fibroblast chemotactic factor in serum by activation of complement. *Arnold E. Postlethwaite, Ralph Snyderman, and Andrew H. Kang*

1386 Participation of monocyte-macrophages and lymphocytes in the production of a factor that stimulates collagenase and prostaglandin release by rheumatoid synovial cells. *Jean-Michel Dayer, Jaqueline Bréard, Leonard Chess, and Stephen M. Krane*

1393 Exposure of platelet fibrinogen receptors by ADP and epinephrine. *Joel S. Bennett and Gaston Vilaire*

1402 Physiological and pharmacological influences on thyroxine to 3,5,3′-triiodothyronine conversion and nuclear 3,5,3′-triiodothyronine binding in rat anterior pituitary. *R. G. Cheron, M. M. Kaplan, and P. R. Larsen*

1415 Eosinophils versus neutrophils in host defense. Killing of newborn larvae of *Trichinella spiralis* by human granulocytes in vitro. *David A. Bass and Pamela Szejda*

1423 Beta adrenergic and muscarinic cholinergic receptors in canine myocardium. Effects of ischemia. *Amal Mukherjee, Teck M. Wong, L. Maximillian Buja, Robert J. Lefkowitz, and James T. Willerson*

1429 Hypothyroidism as a late sequela in patients with Graves' disease treated with antithyroid agents. *Lawrence C. Wood and Sidney H. Ingbar*

1437 In vitro studies of poison oak immunity. I. In vitro reaction of human lymphocytes to urushiol. *Vera S. Byers, William L. Epstein, Neal Castagnoli, and H. Baer*

1449 In vitro studies of poison oak immunity. II. Effect of urushiol analogues on the human in vitro response. *Vera S. Byers, Neal Castagnoli, Jr., and William L. Epstein*

1457 Metabolism of arachidonic acid in ionophore-stimulated neutrophils. Esterification of a hydroxylated metabolite into phospholipids. *William F. Stenson and Charles W. Parker*

1466 Mechanism of inhibition of proximal tubule fluid reabsorption after exposure of the rat kidney to the physical effects of expansion of extracellular fluid volume. *Iekuni Ichikawa and Barry M. Brenner*

1475 Purinogenic immunodeficiency diseases. Differential effects of deoxyadenosine and deoxyguanosine on DNA synthesis in human T lymphoblasts. *James M. Wilson, Beverly S. Mitchell, Peter E. Daddona, and William N. Kelley*

1485 Effects of neomycin alone and in combination with cholestyramine on serum cholesterol and fecal steroids in hypercholesterolemic subjects. *Tatu A. Miettinen*

1494 Effect of furosemide in canine low-pressure pulmonary edema. *J. Ali, W. Chernicki, and L. D. H. Wood*

1505 Effect of fasting and streptozotocin diabetes on insulin binding and action in the isolated mouse soleus muscle. *Y. Le Marchand-Brustel and P. Freychet*

1516 New function for high density lipoproteins. Their participation in intravascular reactions of bacterial lipopolysaccharides. *Richard J. Ulevitch, Alan R. Johnston, and David B. Weinstein*

RAPID PUBLICATIONS

1525 Suppression of immune complex vasculitis in rats by prostaglandin. *Steven L. Kunkel, Roger S. Thrall, Robin G. Kunkel, James R. McCormick, Peter A. Ward, and Robert B. Zurier*

1530 Cross-idiotypic antigens among monoclonal immunoglobulin M from patients with Waldenström's macroglobulinemia and polyneuropathy. *Koussay Dellagi, Jean-Claude Brouet, and Françoise Danon*

1536 NOVEMBER AUTHOR INDEX

DECEMBER 1979 VOLUME 64 NUMBER 6

1537 Isolation and characterization of heparin from human lung. *Dean D. Metcalfe, Robert A. Lewis, Jeremiah E. Silbert, Robert D. Rosenberg, Stephen I. Wasserman, and K. Frank Austen*

1544 Inhibition by propionyl-coenzyme A of *N*-acetylglutamate synthetase in rat liver mitochondria. A possible explanation for hyperammonemia in propionic and methylmalonic acidemia. *Francois X. Coude, Lawrence Sweetman, and William L. Nyhan*

1552 Attenuation of angiotensin II- and III-induced aldosterone release by prostaglandin synthesis inhibitors. *William B. Campbell, Celso E. Gomez-Sanchez, Beverley V. Adams, James M. Schmitz, and Harold D. Itskovitz*

1558 Mechanisms of killing of newborn larvae of *Trichinella spiralis* by neutrophils and eosinophils. Killing by generators of hydrogen peroxide in vitro. *David A. Bass and Pamela Szejda*

1565 Role of the liver in regulation of ketone body production during sepsis. *Robert W. Wannemacher, Jr., Judith G. Pace, Francis A. Beall, Richard E. Dinterman, Vance J. Petrella, and Harold A. Neufeld*

1573 Erythropoiesis in vitro. Role of calcium. *John Misiti and Jerry L. Spivak*

1580 Ethylmalonic-adipic aciduria. In vivo and in vitro studies indicating deficiency of activities of multiple acyl-CoA dehydrogenases. *Stephanos Mantagos, Myron Genel, and Kay Tanaka*

1590 Studies of relationships among bile flow, liver plasma membrane NaK-ATPase, and membrane microviscosity in the rat. *Emmet B. Keeffe, Bruce F. Scharschmidt, Nancy M. Blankenship, and Robert K. Ockner*

1599 Effect of central catecholamine depletion on the osmotic and nonosmotic stimulation of vasopressin (antidiuretic hormone) in the rat. *Thomas R. Miller, William A. Handelman, Patricia E. Arnold, Keith M. McDonald, Perry B. Molinoff, and Robert W. Schrier*

1608 Induction of suppressor activity in the autologous mixed lymphocyte reaction and in cultures with concanavalin A. *Judith B. Innes, Mary M. Kuntz, Young Tai Kim, and Marc E. Weksler*

1614 Regulation of the conversion of thyroxine to triiodothyronine in the perfused rat liver. *Anthony S. Jennings, Duncan C. Ferguson, and Robert D. Utiger*

1624 Testicular feminization associated with a thermolabile androgen receptor in cultured human fibroblasts. *James E. Griffin*

1632 T-lymphocyte differentiation in vitro in severe combined immunodeficiency. Defects of stem cells. *Rajendra N. Pahwa, Savita G. Pahwa, and Robert A. Good*

1642 Generation of hydroxyl radical by enzymes, chemicals, and human phagocytes in vitro. Detection with the anti-inflammatory agent, dimethyl sulfoxide. *John E. Repine, John W. Eaton, M. W. Anders, John R. Hoidal, and Richard B. Fox*

1652 Circulating immune complexes in cutaneous vasculitis. Detection with C1q and monoclonal rheumatoid factor. *Susan E. Mackel, Gerhard Tappeiner, Hilton Brumfield, and Robert E. Jordon*

1661 Serum and urine polyamines in normal and in short children. *Daniel Rudman, Michael H. Kutner, Rajender K. Chawla, Martin A. Goldsmith, R. Dwain Blackston, and Raymond Bain*

1669 Metabolic clearance and production rates of prolactin in man. *D. S. Cooper, E. C. Ridgway, B. Kliman, R. N. Kjellberg, and F. Maloof*

1681 Renal tubular sites of altered calcium transport in phosphate-depleted rats. *Kai Lau, Zalman S. Agus, Martin Goldberg, and Stanley Goldfarb*

1688 Importance of hepatic portal circulation for insulin action in streptozotocin-diabetic rats transplanted with fetal pancreases. *Josiah Brown, Yoko Mullen, William R. Clark, I. Gabriella Molnar, and Diane Heininger*

1695 Biotin-response organicaciduria. Multiple carboxylase defects and complementation studies with propionic-acidemia in cultured fibroblasts. *M. Saunders, L. Sweetman, B. Robinson, K. Roth, R. Cohn, and R. A. Gravel*

1703 Appearance and characterization of lipoprotein X during continuous intralipid infusions in the neonate. *E. Griffin, W. C. Breckenridge, A. Kuksis, M. H. Bryan, and A. Angel*

RAPID PUBLICATIONS

1713 Humoral factor that specifically regulates factor X levels in rabbits (coagulopoietin-X). *D. Trauber, K. Hawkins, M. Karpatkin, and S. Karpatkin*

1717 Lactoferrin acts on Ia-like antigen-positive subpopulations of human monocytes to inhibit production of colony stimulatory activity in vitro. *Hal E. Broxmeyer*

1721 Regulation of calcitonin secretion in normal man by changes of serum calcium within the physiologic range. *Lynn A. Austin, Hunter Heath III, and Vay Liang W. Go*

1725 Hydroxyl radical generation by polymorphonuclear leukocytes measured by electron spin resonance spectroscopy. *H. Rosen and S. J. Klebanoff*

1730 DECEMBER AUTHOR INDEX

1731 INDEXES TO VOLUME 64
